

Early Commitment Policy (YNHH)

The residency advisory board (RAB) will determine which PGY2 programs will offer early commitment annually. Programs that choose not to offer early commitment or programs that do not enter a signed commitment agreement with a successful internal candidate by the ASHP Midyear Meeting will follow the usual Match process.

Current PGY1 pharmacy practice residents at YNHH are eligible to apply for a PGY2 program at YNHH through the early commitment process. Interested residents must submit a letter of intent and current curriculum vitae (CV) to the appropriate PGY2 program director by **October 30th**. In addition, residents must contact the program director directly and submit any program specific requirements along with their letter of intent and CV.

Interviews will occur during the first weeks of November. You will be notified during the last week of November regarding decisions on early commitment. If you are offered a position, a response is required within 7 days. A signed commitment letter between the PGY1 and PGY2 director is also required for submission to the National Matching Service in accordance with the early commitment standards.

Please contact the appropriate Residency Program Director if you have any questions.
